PROFESSIONAL EXPERIENCE

UNITED COMMUNITY CENTER Milwaukee, WI
Database Administrator Dec 2025 to Current
Support database administration, reporting development, workflow improvement, and technology operations for organizational systems. Maintain data accuracy, improve reporting access, and strengthen internal processes related to

quarterly workflows, device management, and asset tracking. Collaborate with staff across departments to troubleshoot system issues, improve data visibility, and create more efficient processes for operational decision-making.

- Improved quarterly database and reporting workflows, reducing manual resource allocation and increasing operational efficiency.
- Advanced reporting tools to provide faster insight into key organizational metrics for leadership and department teams.
- Corrected device and asset management processes by improving tracking, documentation, and lifecycle visibility.
- Maintained database accuracy through data validation, cleanup, and process standardization.
- Collaborated across departments to identify workflow gaps, troubleshoot system issues, and implement practical technology solutions.
- Created documentation for recurring database, reporting, and asset-management tasks to improve consistency and reduce process delays.
- Automated multiple workflows across different departments, increasing overall efficiencies.

VERIFIED STAFFING

Milwaukee, WI

Recruiting Manager

May 2025 to November 2025

Oversee daily staffing operations, technology support, and client coordination for a growing workforce solutions firm. Manage candidate onboarding, systems access, and technology troubleshooting for internal recruiters and client employees. Support development and maintenance of recruiter and payroll portals to streamline workflows and compliance.

- Implemented and maintained applicant tracking and payroll systems, leveraging technical troubleshooting to ensure 99% uptime for recruiters and hiring managers.
- Provided Tier 1 technical support for internal users, resolving software access, email configuration, and data synchronization issues through remote tools, reducing downtime by 30%
- Created automated intake forms and digital document workflows (I-9, W-4, timesheets) using cloud-based tools, improving onboarding completion rate by 45%.
- Coordinated communication between recruiters, clients, and candidates using centralized CRM tools; streamlined candidate placement tracking for over 200 weekly applicants.

WEST ALLIS POLICE DEPARTMENT

West Allis, WI

Police Officer

March 2025 to May 2025

Provided community protection and emergency response while utilizing technology systems for case management, communications, and reporting. Developed advanced communication, decision-making, and critical problem-solving skills under high-pressure environments.

- Operated digital reporting systems and in-vehicle computer systems to document and process case data with 100% accuracy.
- Applied investigative problem-solving and data analysis to resolve complex incidents, demonstrating adaptability and strong situational awareness.
- Received commendations for teamwork, leadership, and quick problem resolution under pressure—transferable skills directly relevant to IT incident management.

MANPOWER GROUP SOLUTIONS

Milwaukee, WI

Talent Operation Coordinator

July 2024 to March 2025

Delivered full-cycle recruiting and onboarding support for multiple client accounts. Supported internal systems, database integrity, and candidate documentation. Functioned as a bridge between HR, operations, and IT functions to ensure seamless placements and compliance tracking.

- Managed onboarding of 50+ employees weekly through digital portals, ensuring accurate system configuration and timely credentialing.
- Utilized Excel reporting and ATS data queries to track candidate status, improving reporting efficiency by 25%.
- Coordinated with IT support to troubleshoot account setup and timesheet access issues, ensuring 100% employee readiness by start dates.
- Enhanced internal tracking processes using data validation and workflow tools, improving placement speed and reducing administrative errors.
- Provided end-user training on device security, system access, and application navigation, enhancing compliance awareness among 100+ staff members.
- Diagnosed and resolved endpoint and access issues using ticketing systems (Service Now), maintaining SLAs and contributing to 80% first-contact resolution rates.
- Assisted in root cause analysis for recurring connectivity and software issues; documented resolutions to expand internal knowledge base.

ADVOCATE AURORA HEALTH

West Allis, WI

Public Safety Officer

March 2024 to July 2024

Provided community protection and emergency response while utilizing technology systems for case management, communications, and reporting. Developed advanced communication, decision-making, and critical problem-solving skills under high-pressure environments.

- Operated digital reporting systems to document and process case data with 100% accuracy.
- Applied investigative problem-solving and data analysis to resolve complex incidents, demonstrating adaptability and strong situational awareness.
- Received commendations for teamwork, leadership, and quick problem resolution under pressure—transferable skills directly relevant to IT incident management.

MADISON POLICE DEPARTMENT

Madison, WI

Police Officer

April 2023 to January 2024

Provided community protection and emergency response while utilizing technology systems for case management, communications, and reporting. Developed advanced communication, decision-making, and critical problem-solving skills under high-pressure environments.

- Operated digital reporting systems and in-vehicle computer systems to document and process case data with 100% accuracy.
- Applied investigative problem-solving and data analysis to resolve complex incidents, demonstrating adaptability and strong situational awareness.
- Received commendations for teamwork, leadership, and quick problem resolution under pressure—transferable skills directly relevant to IT incident management.
